Nov-16: Whats next in SWITCHportfolio?

- Small point releases 16.04.x occasionally
- Prepare for the large version update 17.04 (summer 2017)
- Join the group “[SWITCHportfolio Update 17.04](#)”
 - test the new features in the online versions of Mahara
 - watch out for changes in the GUI
 - adjust your tutorials, documentation
- Adjust & improve the Desaster-Recovery-Plan
- Transfer the portfolio data to staging on 1st day 01:00 am each month

Small fixes:

1. Hide the Detail Links (small chain element)
2. Print Command is back (to create pdfs)
3. Shared collections were not visible for group members
(If one creates a collection of pages and shares the collection with a group but at some stage removes the first (top) page from the collection via the collection views page it becomes 'hidden' from the 'Group pages' collections shared with group list.)
4. Security update to 16.04.5
5. Install / Update of Europass-Plugin?
[Europass plugin for Mahara version 16.04 and 16.10 \(2017020107\)](#)

Avoid any service interruptions / downtimes: eg. Jan-3-2017

10:20 portfolio down - but staging still running fine. There's a problem in the LS region

10:57 Valery informs about the root cause - no info about time frame for solution

11:15 Request to switch over to DR system

11:35 Failover to DR system complete

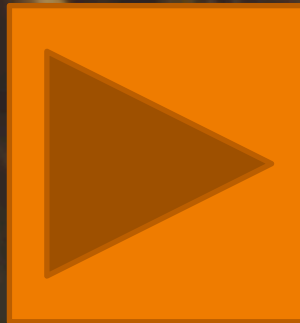

11:50 System rebooted

11:51 SWITCHportfolio is up again (now running as DR at the ZH location)
