Which educational scenarios can you envision for using Virtual Reality?
Idea Sketchboard

- Train behaviour in risky situations / real situations → create experiences
  - Create emotions: train high stress reactions
    - E.g.: create situations in which people tend to panic and train them staying calm

- Enable 3D-views of constructed buildings to architecture students
  → Feedback how it would feel like to live in these buildings

- Enable 3D-views of cells / atoms / the inside of several things we cannot easily enter

- Talk to experts (live)

- Virtual discussions with suitable peers (better matching) → matrix
  - Same difficulty
  - Same interest
  - Dangerous stuff → save environment
  - Labs
  - Flying
  - Cars

- Psychology → beneficial experience
Which educational scenarios can you envision for using Virtual Reality?

- Dealing with risks
- Training complex decision making
- Training practical skills or difficult situations (medical field)
- Simulations of any kind
  - Virtual labs
  - Pilot training
  - Etc.

In general, I find Virtual Reality (VR) engaging. [X] Agree

What educational scenarios can you envision for using Virtual Reality?

How do you assess the potential of VR in the class?

- I think I can incorporate VR experience in my class.
- I don’t think VR is interesting for education.

Where do you see VR in the Classroom as a Trend?

- For engineers, not so applicable. These are already simulators.
- Training individual writing skills such as balance. Might be useful for certain skills as another method of practice + better training.

I find this workshop inspiring! [X]

Which educational scenarios can you envision for using Virtual Reality?
Idea Sketchboard

- Manipulating machines/vehicles (transplant, engine)
- Train safety topics (like flight simulators)
- Train disaster relief (complex, emotional settings in human catastrophes)
- 3D videos under virtual fire

Training feinmotorischer fähigkeiten in der Chirurgie - ausbildung
