

Artificial Intelligence for Smart Content Creation in Education

Nikola Nikolov, Smartest Learning AG
EduHub webinar, 03.03.2022

www.smartest.io

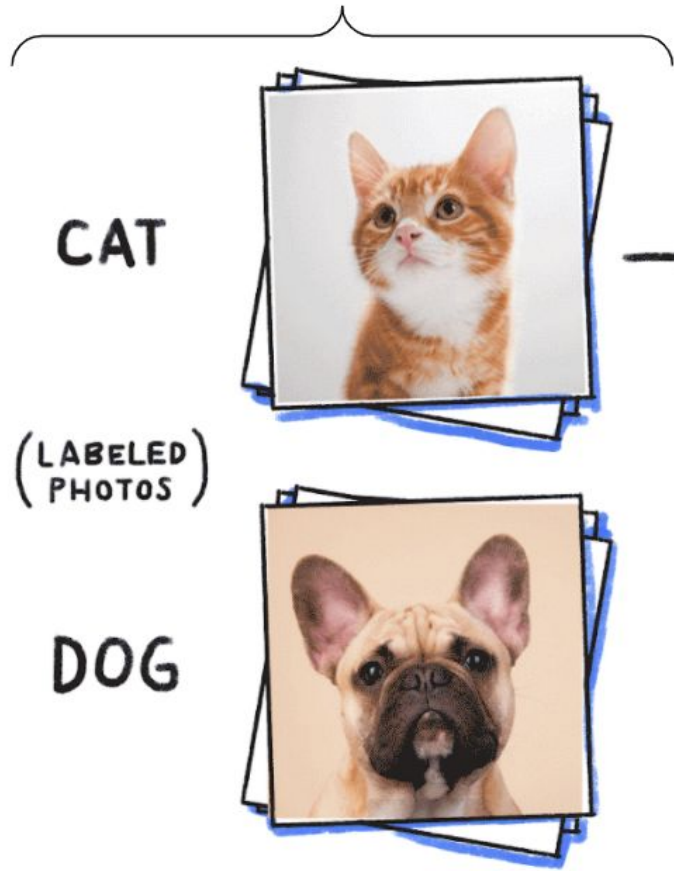

Today's talk

1. Quick introduction to AI
2. Overview of modern use cases of AI in education
 - a. Personalised learning
 - b. Universal access
 - c. Class analytics
 - d. Smart feedback
 - e. Smart content creation
3. AI for smart content creation - the case of Smartest Learning
4. Final thoughts / Q&A

What is Artificial Intelligence (AI)?

- The study of **intelligent agents** - systems that perceive their environment and take actions that maximise the chance of achieving a goal.
- **Machine Learning** - the study of computer algorithms that improve automatically through experience.

✓ GOT IT

AI is already part of our daily lives

DeepL

Spotify®

Beyond day-to-day applications:

- Automated drug discovery
- Manufacturing
- ...Many others...

TESLA

AI will augment us, not replace us

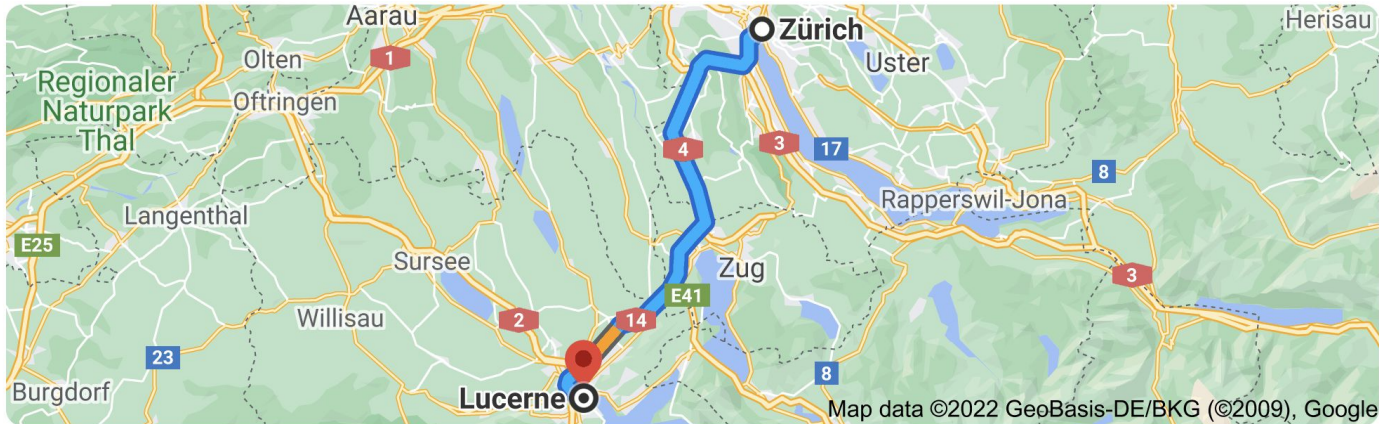

- AI doesn't work as well for higher-order tasks
 - Complex decision making
 - Creativity
- Biggest impact of AI in the coming decades:
 - Specialized, clearly defined use cases that are repetitive
 - Few edge cases
 - Not safety critical
 - A lot of data is available for training
 - Human in the loop

Artificial Intelligence in Education

- **Teachers:** automate/augment repetitive pedagogical tasks
 - Create multiple versions of the same test
 - Grade tests, and provide feedback to students much more quickly
 - Analyse the performance of individual students, or of a class as a whole
- **Students:** more flexibility and greater autonomy
 - Get a personalised learning trajectory depending on:
 - Prior performance
 - Special needs
 - Improve communication with teachers
 - Receive instant feedback
- Free up time for more complex pedagogical tasks
 - Critical debate in class
 - Collaborative projects

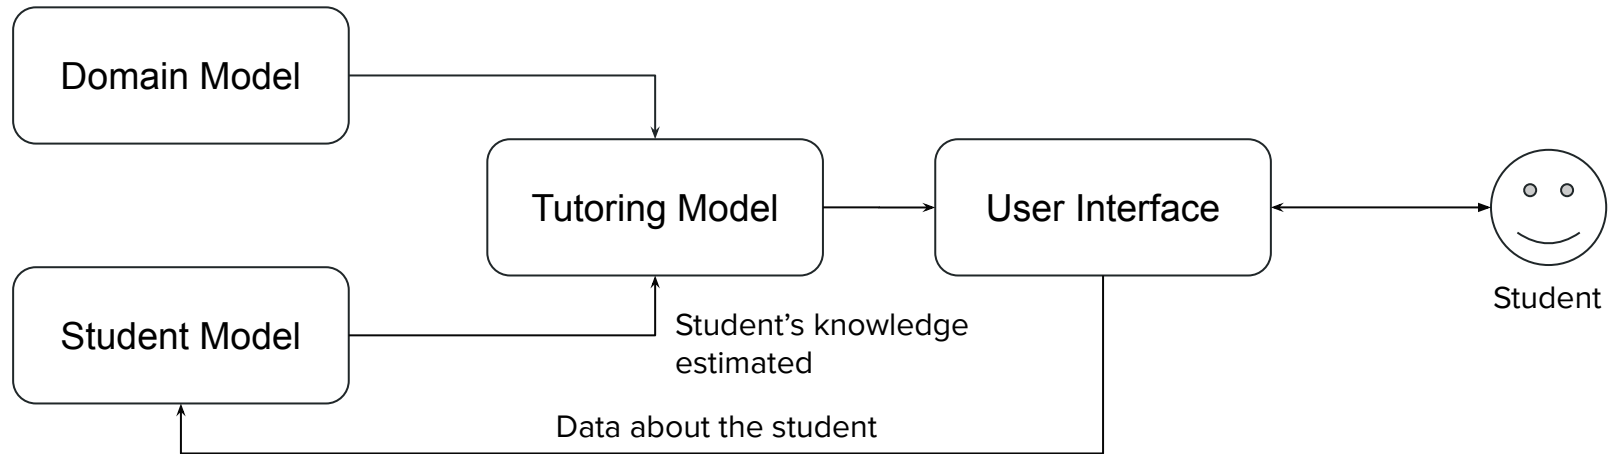

Personalised learning

- Each student is different and has a different learning pace and needs
- 1:1 tutoring is expensive and time consuming
- Create a personalised learning trajectory for each student
 - Automatically collect feedback and adjust

Personalised learning

- Build a model of the student, that is updated through feedback
- Recommend the best possible next learning step

Profile French Shop

A grid of skill icons for French. Each icon is in a circle and has a progress bar below it. The skills are: Abs. Ob. 3 (lightbulb), Pluperfect (runner), Nature (tree), Materials (log), Gerund (runner), Arts (crossed tools), Future (runner), and Measures (ruler). The 'Measures' skill has a '2/3' indicator.

Abs. Ob. 3 Pluperfect Nature

Materials Gerund Arts

Future Measures
2/3

Practice Weak Skills

< Verbs: Gerund

Weakest words

faisant, disant,
agissant, ayant, étant

STRENGTHEN

Smart feedback

- Essay analysis/scoring
- Writing analysis and feedback
- Authorship verification

grammarly

The majestic blue whale, the goliath of the sea, certainly stands alone within the animal kingdom for its adaptations beyond its massive size.

At 30 metres (98 ft) in length and 190 tonnes (210 short tons) or more in weight, it is the largest existing animal and the heaviest that has ever existed. Despite their incomparable mass, aggressive hunting in the 1900s by whalers seeking whale oil drove them to the brink of extinction. But there are other reasons for why they are now so endangered.

The blue whale's common name derives from bluish-hue that covers the upper side of its body, while its Latin designation is *Balaenoptera musculus*. The blue whale belongs to the Mysticeti suborder of cetaceans, also known as baleen whales, which means they have fringed plates of fingernail-like material, called baleen, attached to their upper jaws. Blue whales feed almost exclusively on krill, though they also take small numbers of copepods. An adult blue whale can eat up to 40 million krill in a day.

These gargantuan beasts used to dominate all the oceans of the Earth up until the late nineteenth century, when the technology was developed to effectively hunt and harvest them. In 1864, the Norwegian Svend Foyn equipped a steamboat with harpoons specifically designed for catching large

If you have any questions about my rate or
if you find it necessary to increase or
decrease the scope for this project, please
let me know.

 **Rephrase sentence**

*If you have any questions about my rate or ~~if-you~~ find
it necessary to increase or decrease ~~the scope for~~
this ~~projeet~~ ~~project's scope~~, please let me know.*

Universal access

Accommodate for all students:

- Accommodate for students that might have visual/hearing/other impairments
- Translate and deliver content in multiple languages to create “global” classrooms
 - Access specialised subjects only available in other schools/online
- Immersive remote learning for students that can't attend in person

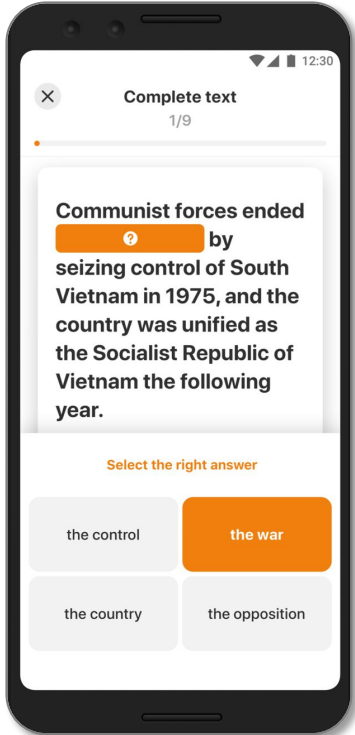

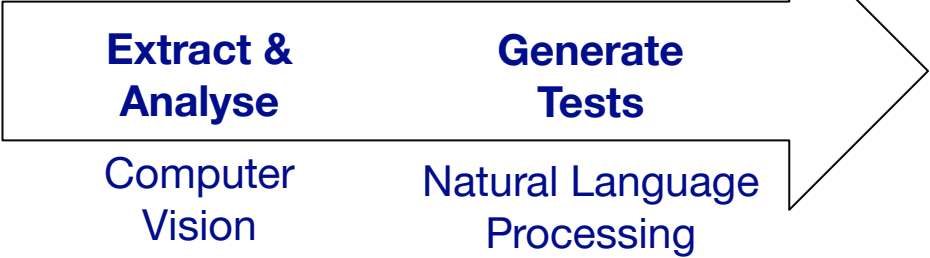

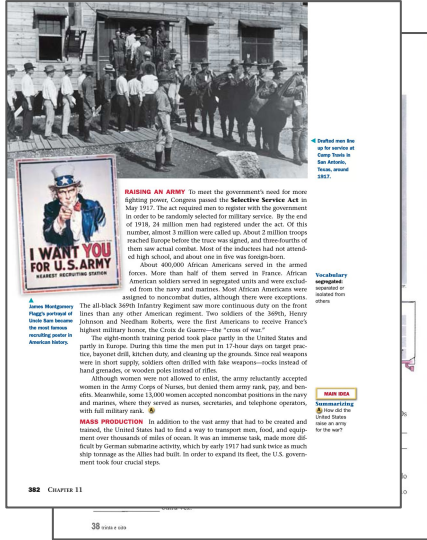

Smart content creation

Generate new learning content: either completely from scratch, or with some user input.

- Exercises
- Training modules
- Other materials

Key features of Smartest

- Create **8+ different interactive exercises** with the help of AI, covering all subjects.
- If necessary, **edit the exercises** with our simple interface.
- **Share the exercises** with your class, and collect analytics on your students.
- Possible to **export the exercises** in other platforms, or to print them.
- Developed for **all platforms**: IOS, Android and Web
- **Supported languages**: English, German, French, Italian and Spanish.

Fact-based exercises

- Natural language processing is used:
 - Analyse the content
 - Select answers
 - Generate false options
- Works for all subjects.

Bern is the capital of Switzerland. With a population of about 144,000, it is the fifth-most populous city in Switzerland.

_____ is the capital of Switzerland.

- a. Bern
- b. Zurich
- c. Geneva
- d. Basel

Bern is the second-most populous city in Switzerland. **True or False?**

The benefits of using Smartest

“Smartest for me is saving time, valuable time, because I can finally gather my material together in one app and make it easily accessible for my students.”

Tabea Z., primary and secondary teacher,
ITSmove Winterthur CH

“With Smartest, teachers can create a class activity in a couple of minutes and stimulate discussions around any topic”

Rahel Wüthrich, Director, ITSmove School,
Winterthur CH

Pilot at Ecole Lemania

- We created 250 interactive exercises, targeting the Swiss Maturity exam.
 - Teachers could create more exercises themselves, and assign exercises to their students.
- Different subjects: History, geography, physics, chemistry and biology
- Takeaways:
 - “The interactive format of the exercises makes them more playful and fun.”
 - “By leveraging technology more valuable time can be freed up for other pedagogical tasks essential to 21st-century skills, such as formative feedback, differentiation, and critical debate.”
 - “Textbooks come alive due to Artificial Intelligence”

Conclusion

- AI holds a great potential in Education
 - Augment teachers, not replace them
 - Empower students to explore and to learn at their own pace
- We have looked at several applications of AI in education
 - Personalised learning
 - Universal access
 - Class analytics
 - Smart feedback
 - Smart content creation
- At Smartest, we focus on Smart content creation
 - → make the lives of both teachers and their students easier, and more interactive.

Thank you!
