Thinking, Assistant Professor
Tourism Experience Design

Playful Destination

Origines

ERA-NET JPI Urban Europe Project
Budget 1.4 Mio Euro
Project time 2016-2019

Future

Engage tourism and other stakeholders with playful tools and methods into strategic and sustainable destination development

Aim

Support policy makers and other stakeholders by developing deep reflections and insights about sustainable tourism development

Challenges for DMOs

Restart after the Pandemic

Challenges for DMOs

Overcrowded places

Challenges for DMOs

Pollution

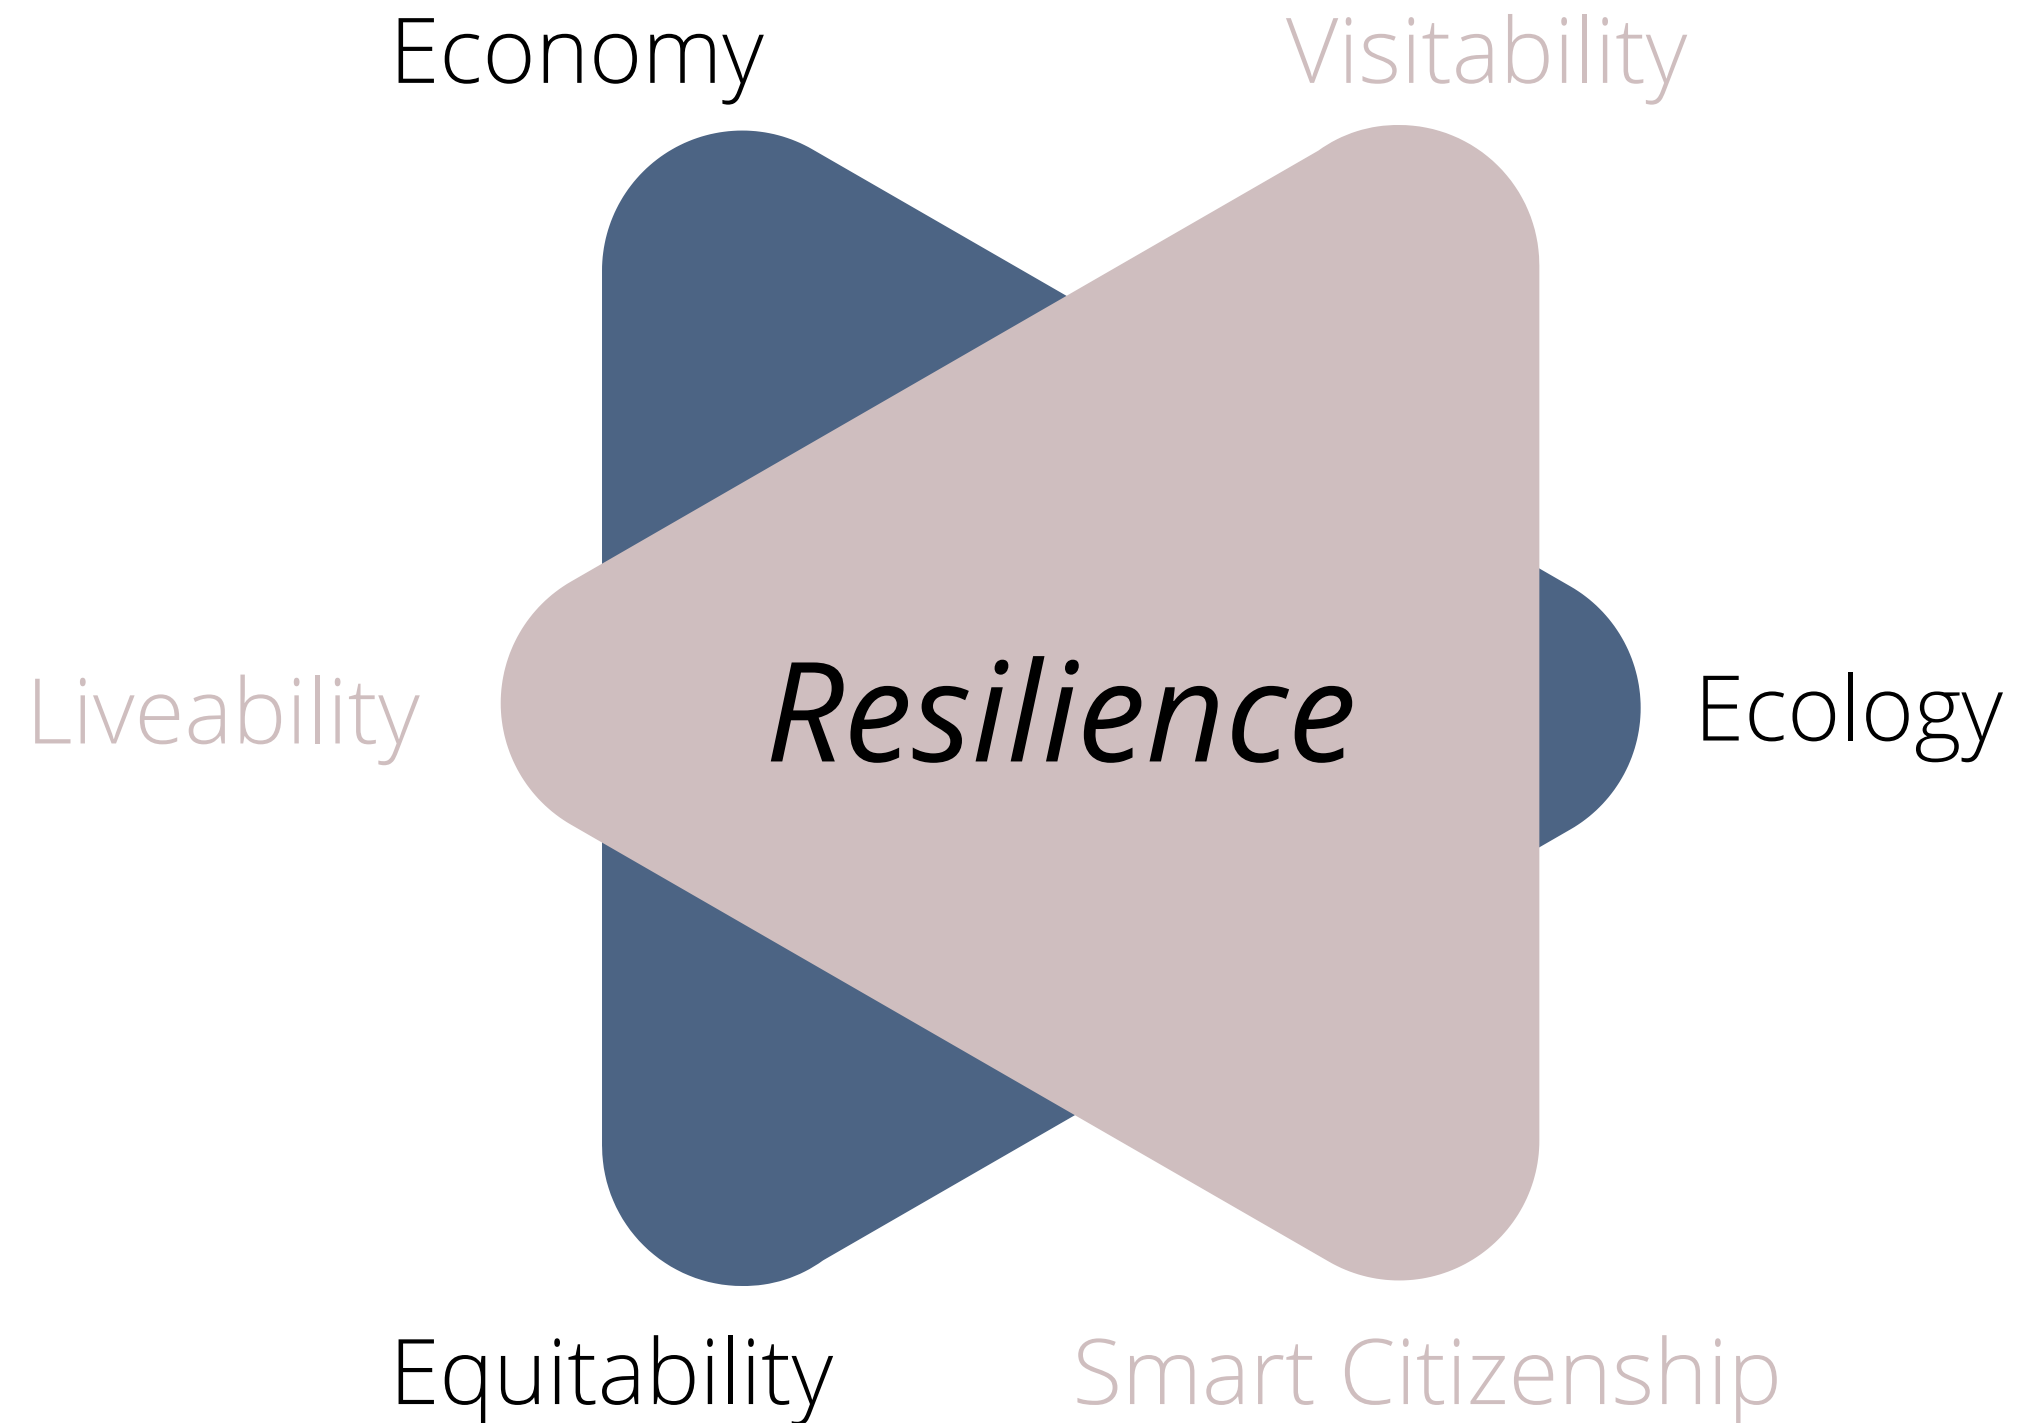

Problem Statement

- ☑ Increasing challenges around tourism growth in urban destinations
- ☑ Lack of innovative and disruptive methods to support planning
- ☑ Limited focus on process of governance in urban tourism planning

Competing Values in a City

HOW CAN WE

- Create an **understanding of complexity** of tourism system beyond tourism?
- **Engage stakeholders** from within and outside tourism – smart citizenship?
- Stimulate **deep reflections** among stakeholders?

Tourism Policy Making

Policies

- Local gov
- National gov
- Official state bodies (DMO)

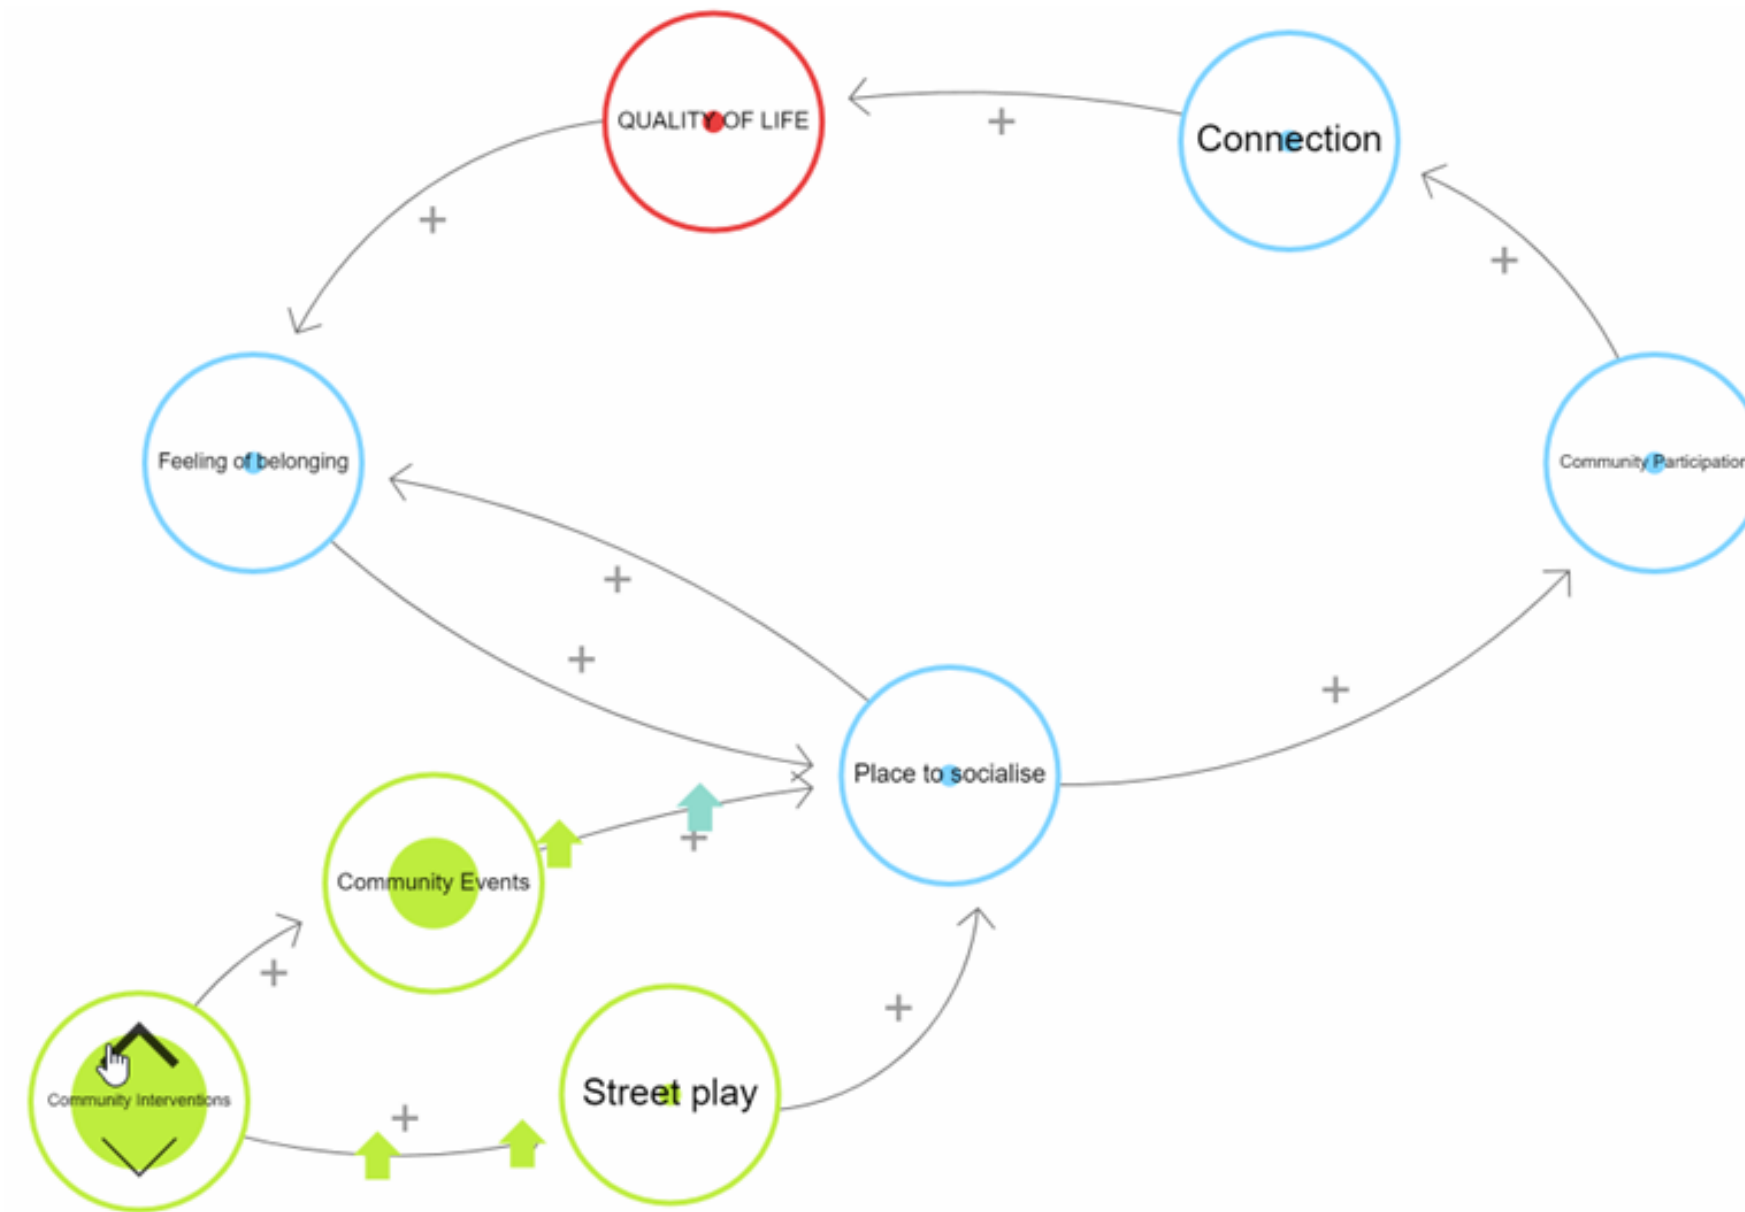

Interventions

- Communities
- NGOs
- Private sector
- Private/Public partnerships
- Resident groups

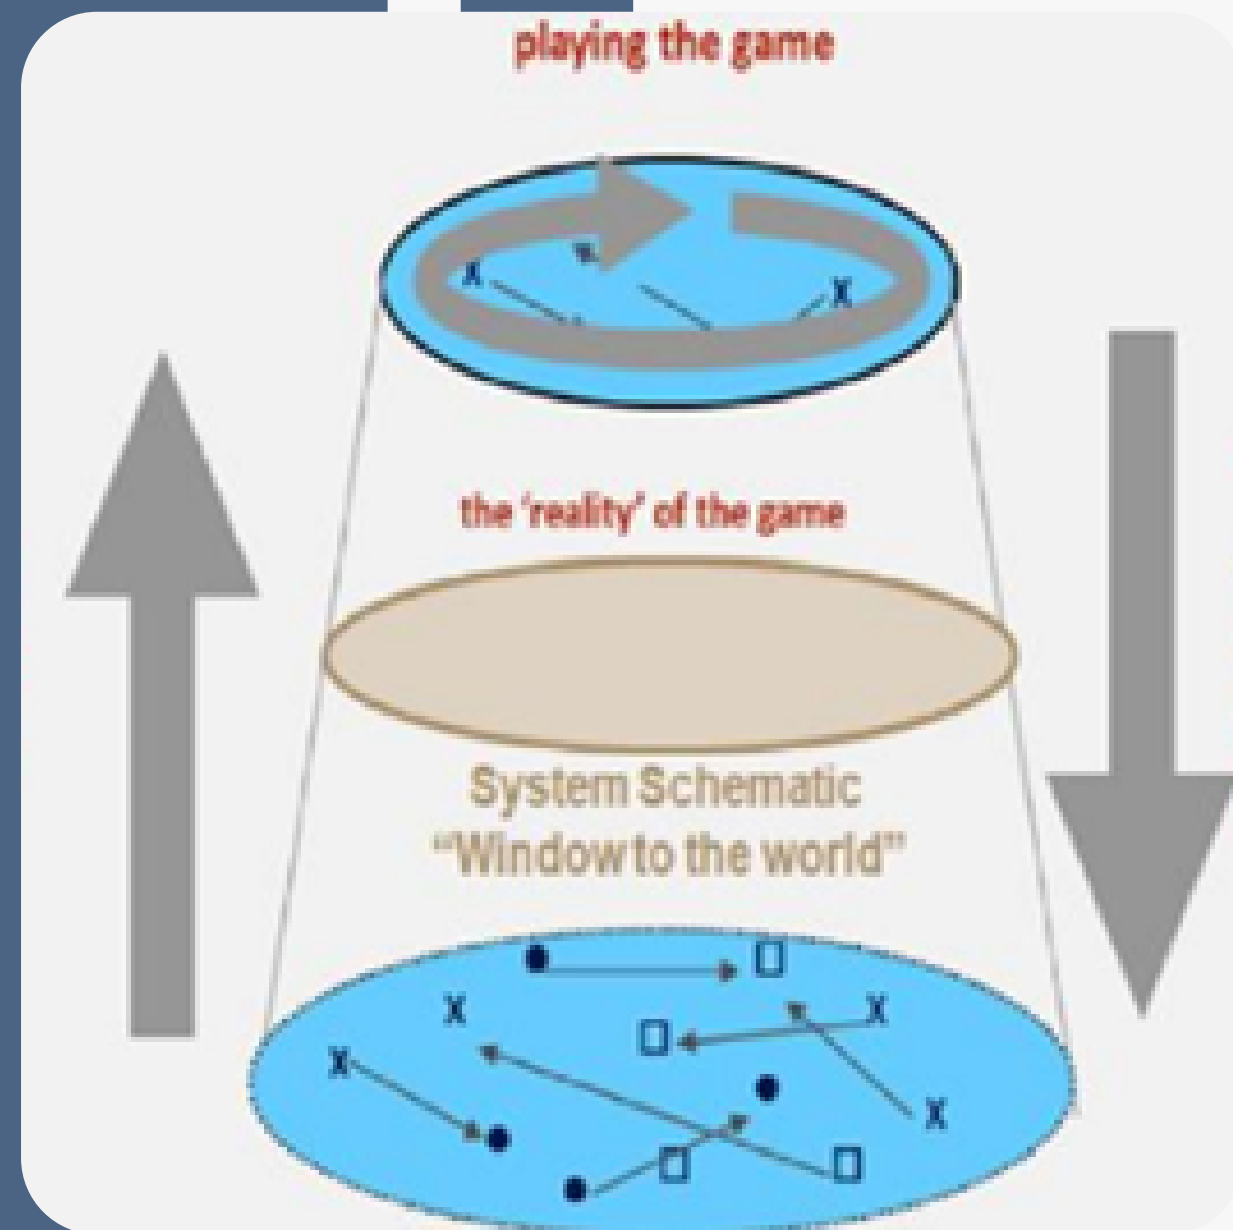

Tourism Policy Interventions

Policies Influence System

Simulation Game

- Simplified representation of the real-life situation
- Tailormade city configuration
- Disruptive manner to bring stakeholders together
- Room for dignified disagreements and perspective taking
- 'Co-design' future destinations
- Testbed for scenario developments

Open Game Event - Breda (BUAS) SCITHOS: From Smart Games to Smart City Planning (longer version)

...and that's where the deep learning happens and the deeper thinking.

Watch on YouTube

PLAYFUL DESTINATIONS

The Game Players

Public Transport

Hospitality

Tourist Attractions

Green NGO

DMO

Game Board

Visualising a simplified version of the city incl. city facilities e.g. hotels, transportation

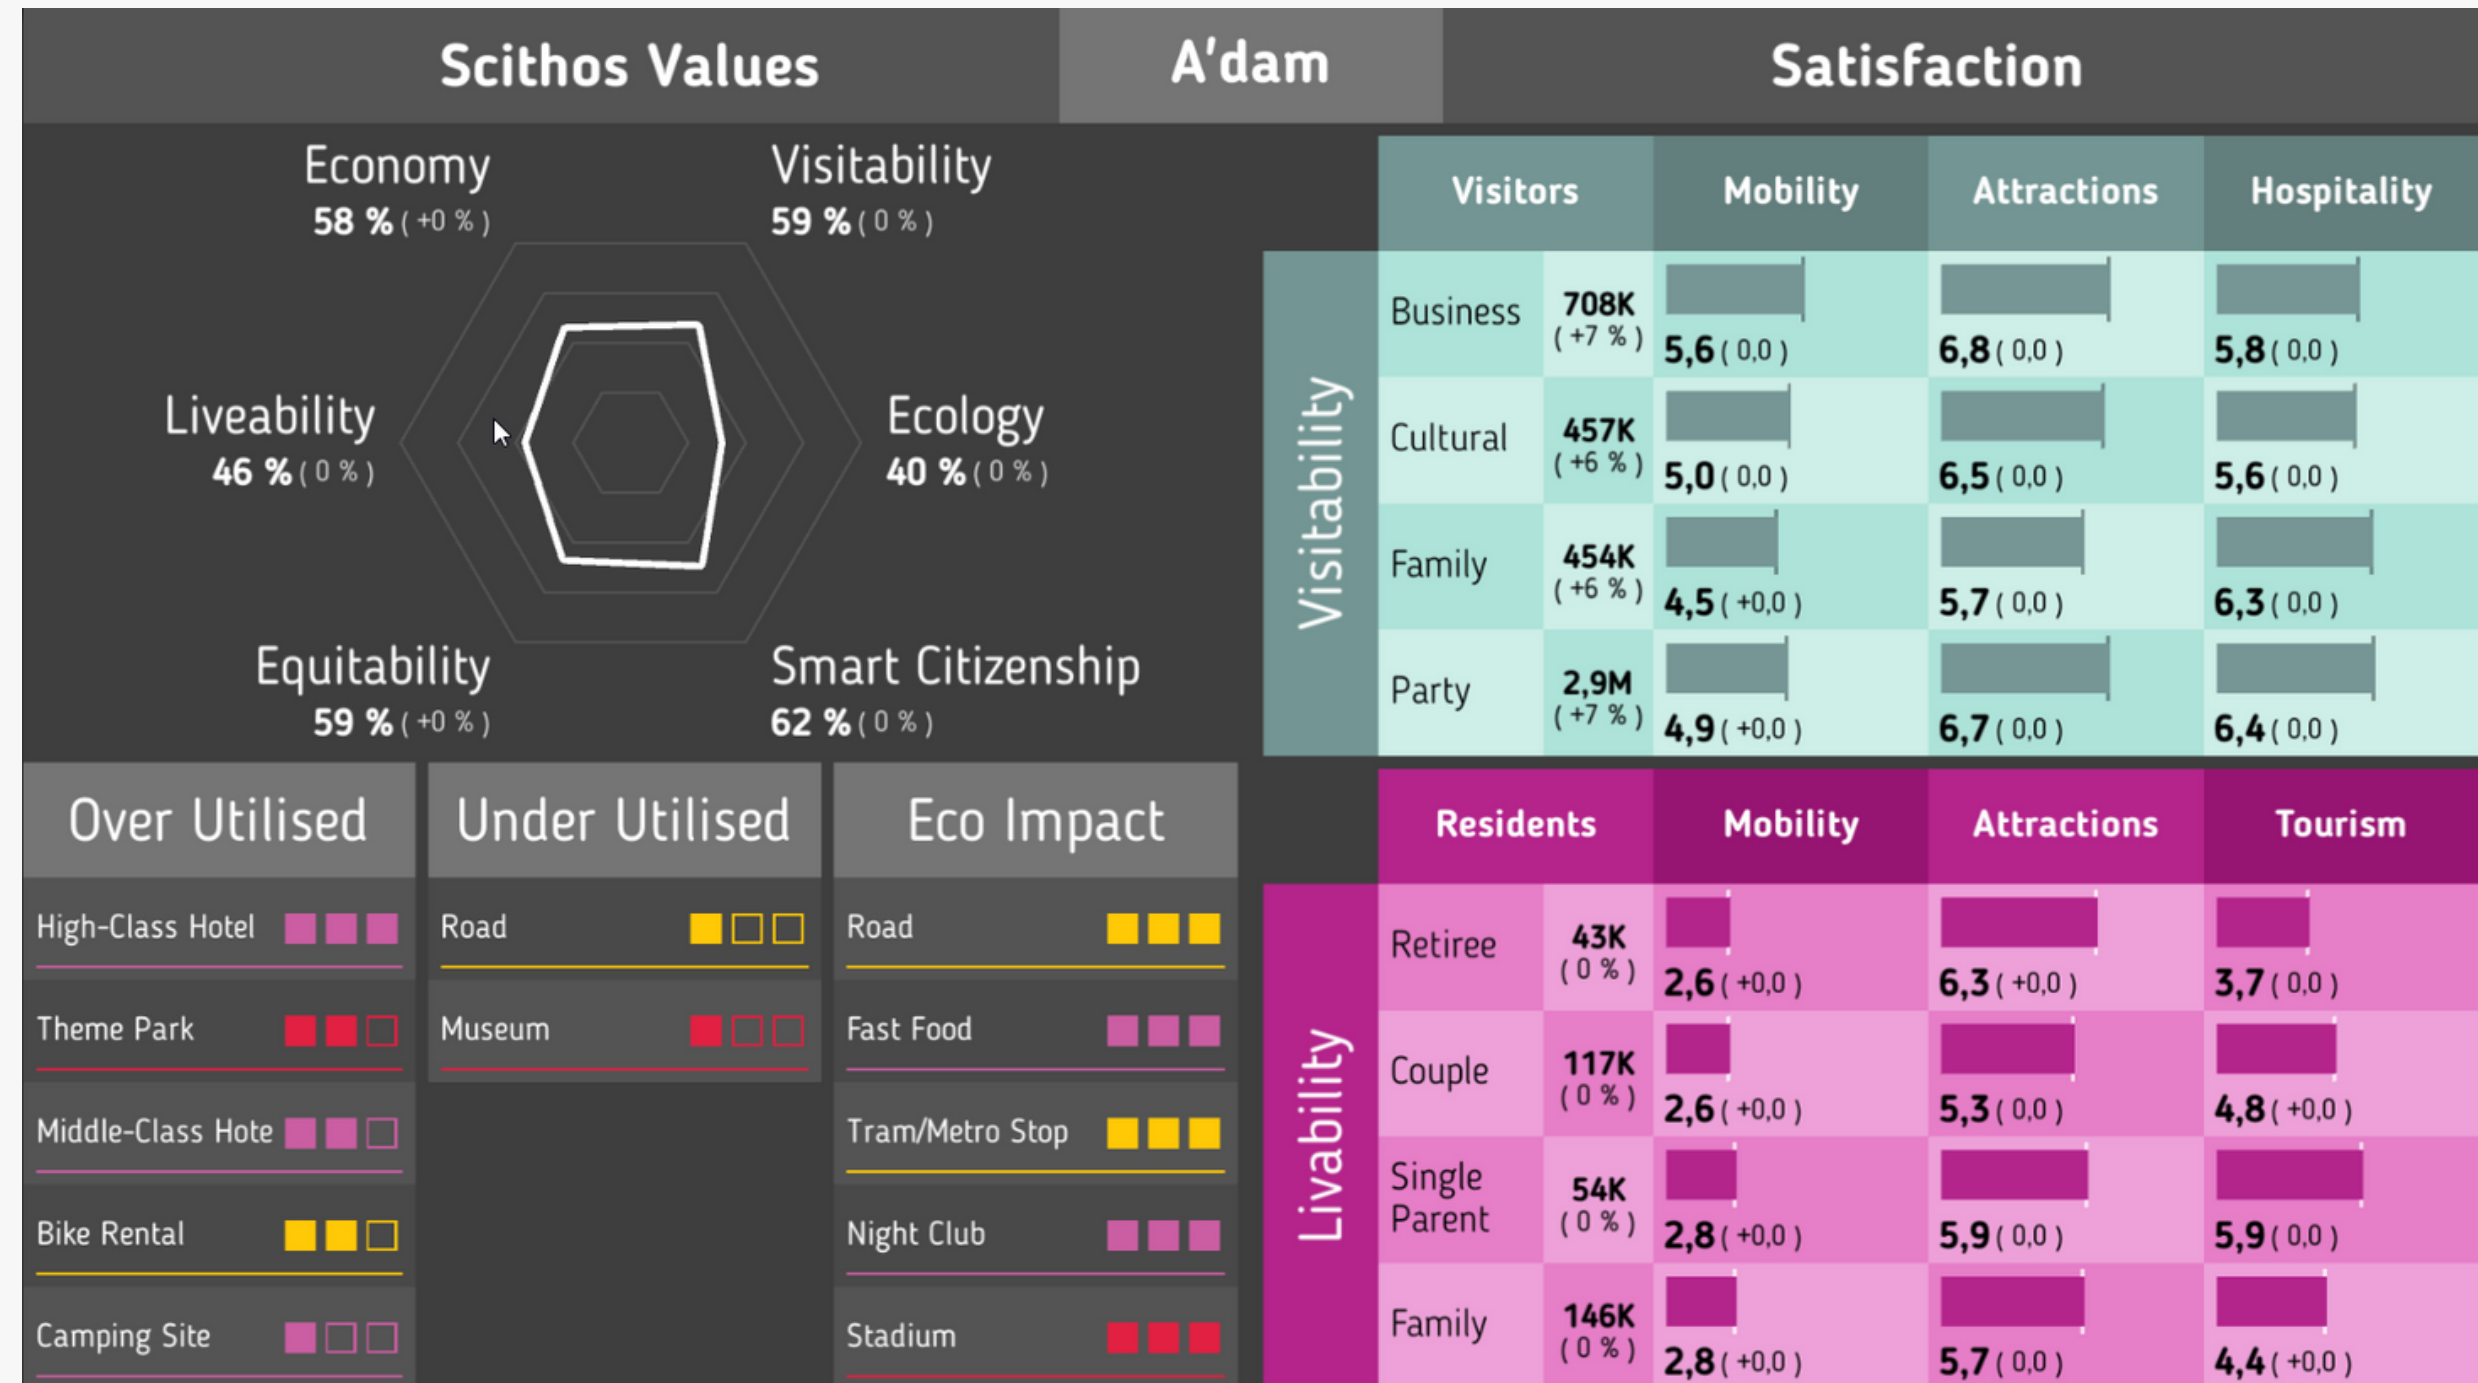

Dashboard

Presenting the values and parameters of sustainable tourism planning

*Visitability

*Livability

Policy Cards

Interventions and policies that interact with the urban tourism ecosystem to plan sustainable strategies

City Use Cases

Valencia

Amsterdam

Gothenburg

Belgrade

Darmstadt

Stavanger

Case Amsterdam

Focus Quality of Life

- Mutual acceptance between residents and visitors
- Increase safety
- Decrease social impact of tourist shops, night clubs and fast food

Increase Quality of Experience

- Improve quality and quantity of tourism attractions
- Demarketing of entertainment facilities
- Decrease negative impact of sharing economy platforms
- Optimise city infrastructure

Voices from the Players

Creative tourism planning tool

Cooperation is essential

Dependence of stakeholders is high

Including everyone is crucial

Fun to play and learn

Future Plans

2022

Establishing a business model for the game incl. series of interventions for tourism planning

2023

Extensions and modifications of the game e.g. other languages, park or coastal extensions

beyond

Online version of the game based on regional and real-time data
