To whom it may concern,

The **University X** endorses the setup of the Swiss MOOC Service project which was accepted by the steering committee of the P5-swissuniversities program in July 2017. With this letter, **University X** commits to publish **n courses** on a dedicated portal of the platform developed and maintained by the Swiss MOOC Service project.

We plan to publish Course 1 as a MOOC and promote it via online marketing to advertise the strong competence of our university in the domain. We also intend to publish Course 2 in parallel on Coursera for the wider public and on the Swiss MOOC Service for our own students. Finally, we want to test an online version of Course 3 that was traditionally given as a face-to-face series of seminars.

Course	Type of course	Source	Start Date	Duration
Course1	MOOC	Migration from Moodle	Sep 2018	5 weeks
Course 2	SPOC	Duplicate Coursera	Feb 2019	14 weeks
Course 3	Continued Education	New development	Sep 2019	5 weeks

A contact person/team from University X, **Mr-s. local-edx**
Swiss MOOC Service on a regular basis to
the platform and to support
courses.
