## Welcome to our Show & Tell

**Morgan Kavanagh**  
English Lecturer

**Daniela Lozza**  
E-Learning LSFM

**Lisa Messenzehl**  
E-Assessment

# What we do

Moodle exams with  
Safe Exam Browser (SEB)  
on students' devices

# Until today...

- pilot exams in 2016: 2 classes (151 students)
- exams in January 2017: 4 classes (226 students)

## Incidents

- Macs had navigation problem in Moodle, caused by old WebKit-version in combination with SEB/Moodle version 2.7 → bug fixed
- few (temporary) Internet losses on students' devices → backup devices and extra time for affected student
- very few students who couldn't remember aai password

# How we do it

- Tutorials for teachers on how to prepare e-assessments
  - Checklist
  - Instructions for SEB configuration (power users)
- Moodle course for students on how to install and test SEB (compulsory!) prior to the exam; partially mock exam
- Support for students in case of any problems with SEB (e-mail or session)
- Exam day: backup devices, backup Moodle users, technical support, presentation to guide through the exam

# LSFM: Paperless studies with 400 students

Notebook  
without  
Touchscreen  
34%

Windows  
Notebook with  
Touchscreen  
27%

Microsoft  
Surface Pro  
24%

Apple Mac  
Book  
(Air / Pro)

Apple iPad  
(Mini/Air/Pro)  
11%

Android  
Tablet  
2%

\*Some students have more than one device.

# Lessons Learned

## Paperless studies are providing a good framework for e-assessments

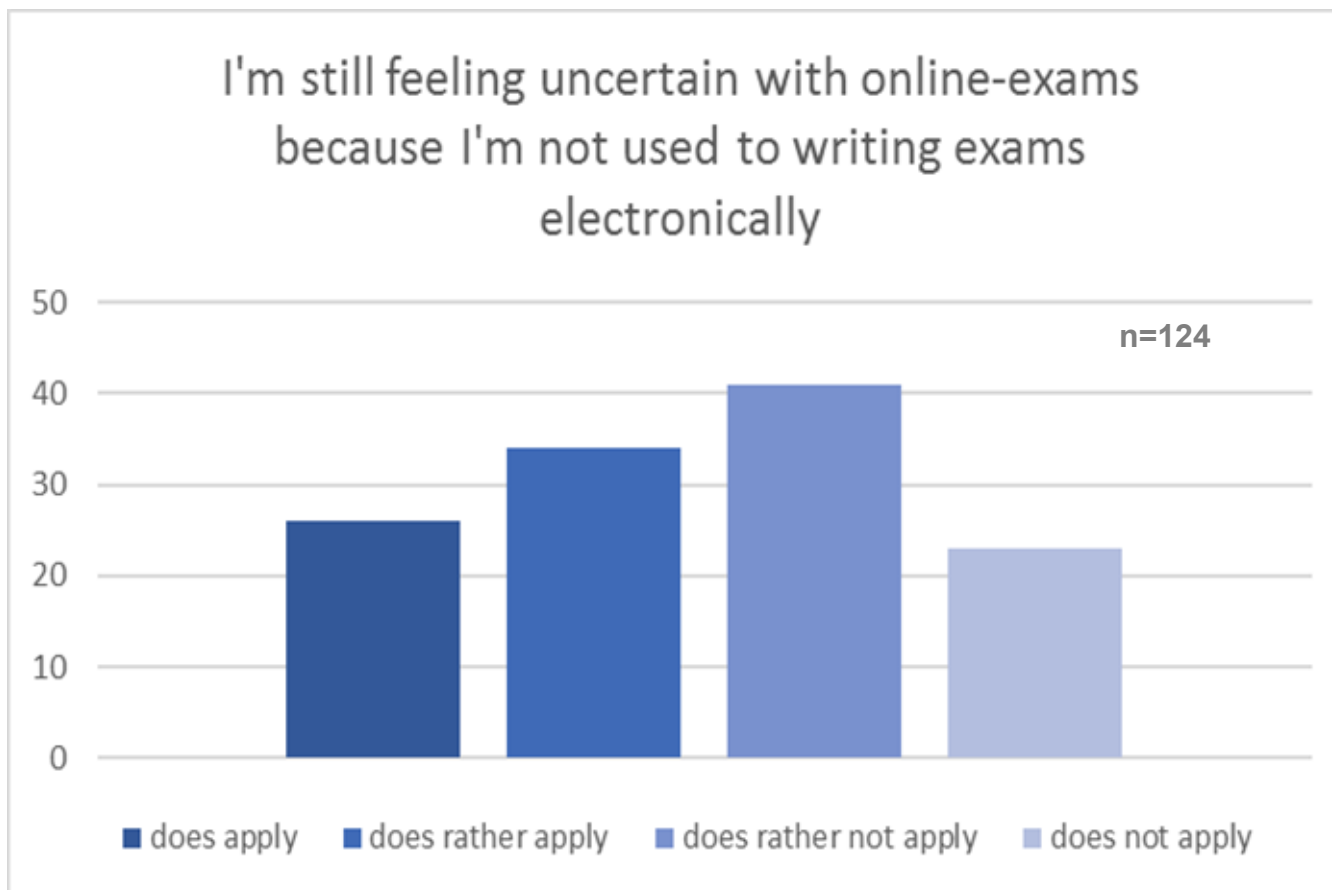

- Students' hardware is renewed much faster than we could afford with managed devices.
- 64% of the students already have at least one device with a touchscreen.
- The more the students work with their devices the less problems they have.

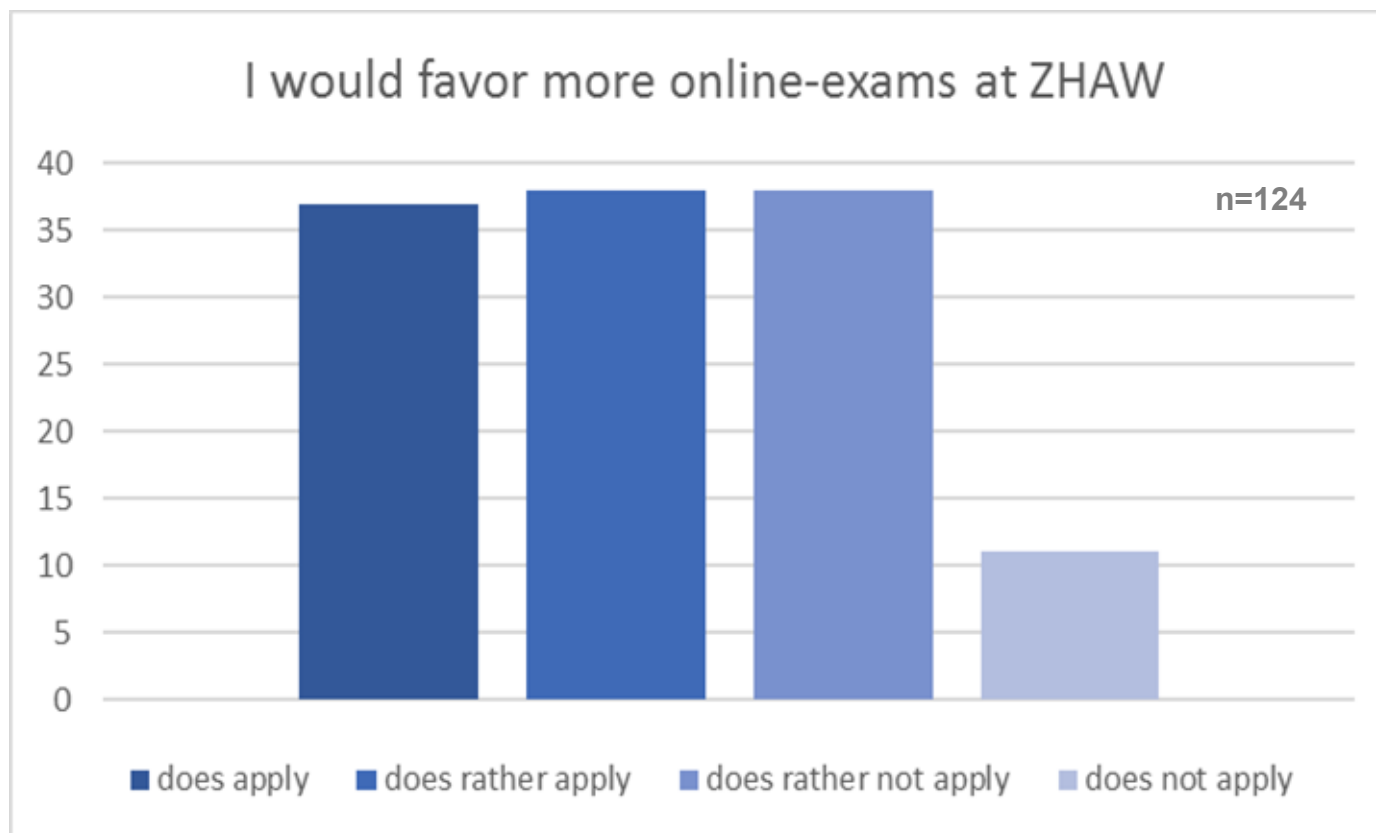

## SEB needs further development

- SEB needs an automated update modus for installation on student devices.
- Students should be able to use annotated digital documents during open book exams.

# Students' evaluation of SEB exams

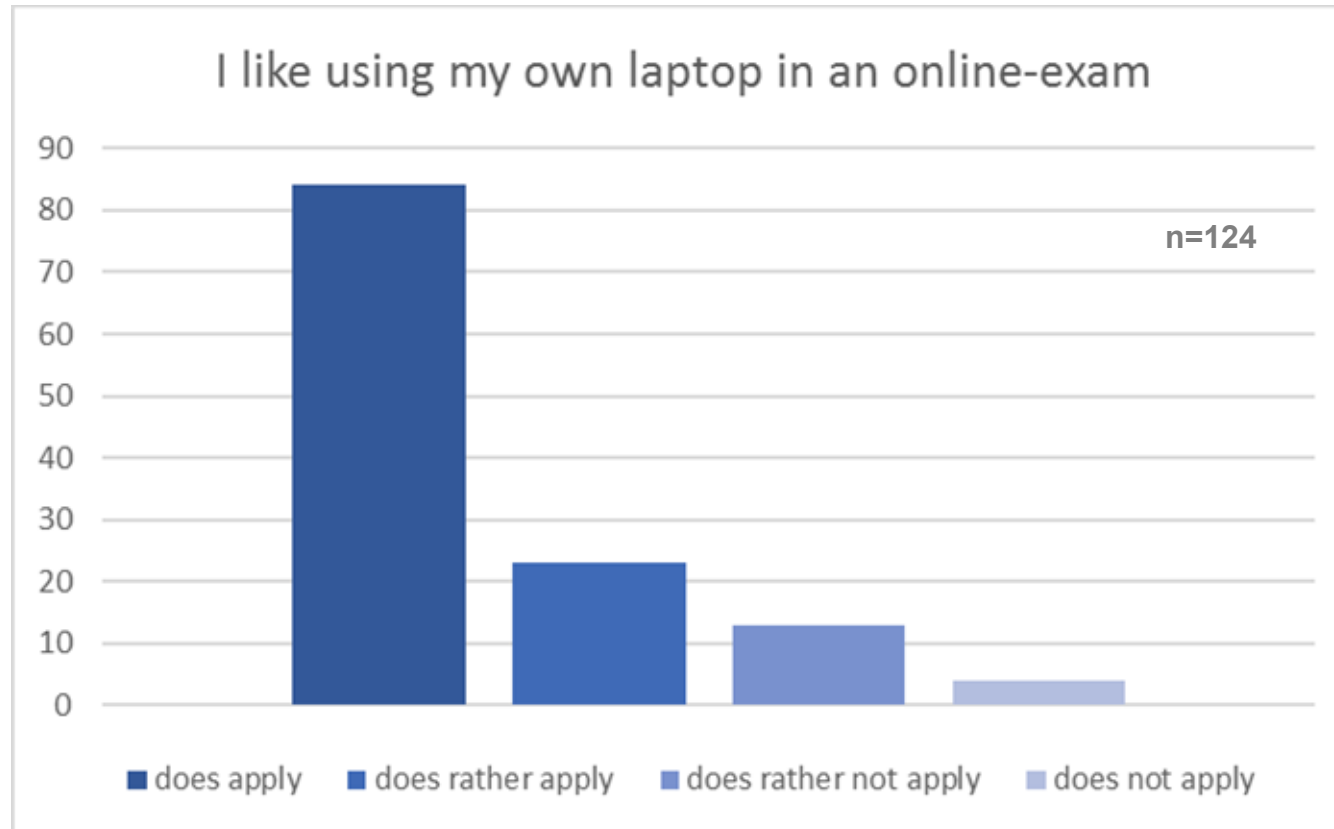

# Students' evaluation of SEB exams

But 60% of the 400 paperless studies students prefer pen and paper exams.

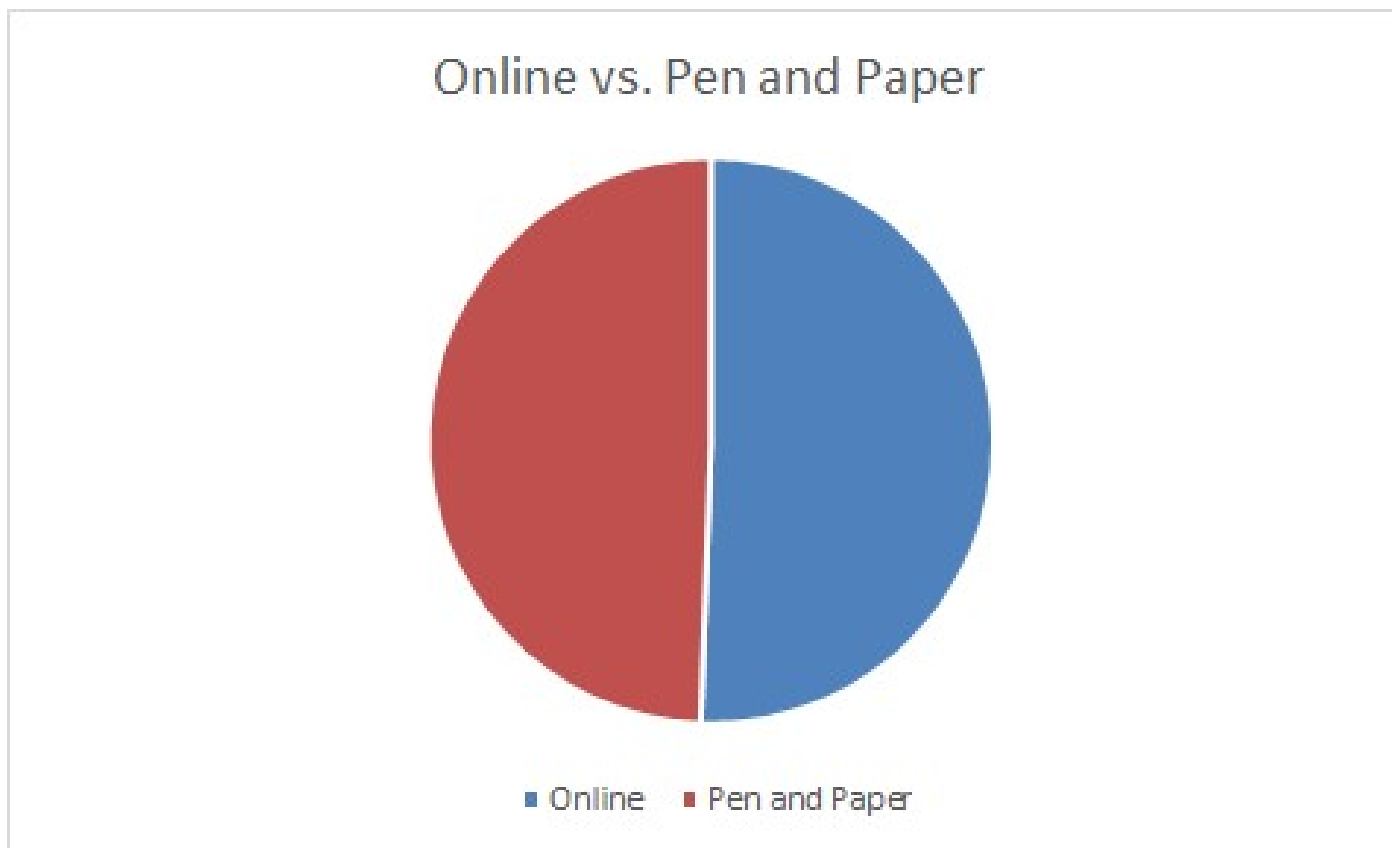

# Students' evaluation of SEB exams

86% like BYOD...

# At SML, we let them choose...

44 online

43 pen and paper

# Students' evaluation

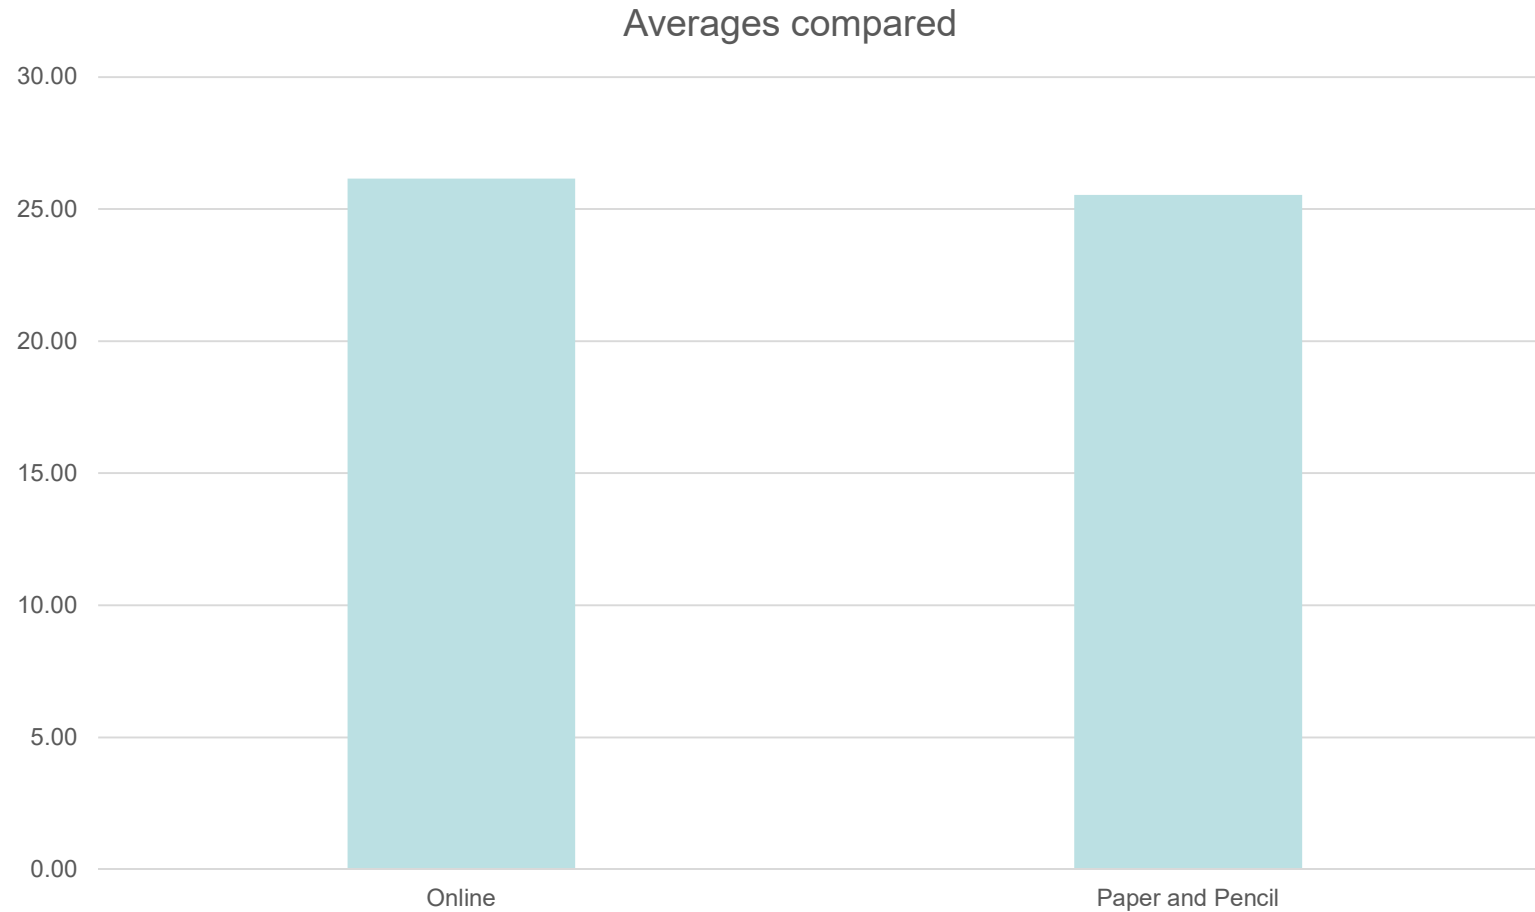

94% of the e-examinees were motivated to do the online-exam by the possibility of typing texts.

# Students' evaluation

72% of the paper-examinees indicated that they were afraid of technical problems during the online-exam.

# Was there any difference in performance?

# Key messages

## **Where technology is involved, risks of failure can not entirely be eliminated, but managed**

- ✓ BYOD: Offer good support and practice, students should have their devices updated
- ✓ Always have enough backup devices
- ✓ Communicate a backup plan in order to reduce anxiety.
- ✓ Clarify actions for teachers and students in case of technical failure.
- ✓ Manage expectations: Technical issues can affect managed devices as well
- ✓ Be positive: If there are technical problems, we'll find a solution
- ✓ Start now: experience comes from practice

# Key questions

- What can we do in order to make e-assessments more appealing to students?
- How can we further reduce tech anxiety?
